

## 2.Designing a Student Profile Page

Use unordered list, ordered list, description list,nested list, and hyperlink.

Program:

```
<!DOCTYPE html>
<html>
<head>
  <title>Student Profile Page</title>
</head>

<body bgcolor="lightyellow">

  <center>
    <h1><font color="darkblue"> 🎓 Student Profile Page 🎓 </font></h1>
  </center>

  <hr color="blue" size="3">

  <h2> 🎓 Student Information</h2>

  <p><b>Name :</b> Savitha R</p>
  <p><b>Department :</b> B.Tech Information Technology</p>
  <p><b>College :</b> Saveetha Engineering College</p>
  <p><b>Year :</b> III Year</p>

  <hr color="green">

  <h2> 📚 Subjects (Unordered List)</h2>

  <ul>
    <li>Web Technology</li>
    <li>Data Structures</li>
    <li>Java Programming</li>
    <li>Python Programming</li>
```

```
<li>Database Management System</li>
</ul>
```

```
<hr color="red">
```

```
<h2> 🏆 Daily Routine (Ordered List)</h2>
```

```
<ol>
  <li>Wake Up</li>
  <li>Go to College</li>
  <li>Attend Classes</li>
  <li>Complete Assignments</li>
  <li>Study for Exams</li>
</ol>
```

```
<hr color="purple">
```

```
<h2> 💻 Skills (Description List)</h2>
```

```
<dl>
  <dt><b>HTML</b></dt>
  <dd>Used to create web pages.</dd>

  <dt><b>CSS</b></dt>
  <dd>Used to style web pages.</dd>

  <dt><b>JavaScript</b></dt>
  <dd>Used to add interactivity to websites.</dd>
</dl>
```

```
<hr color="orange">
```

```
<h2> 📁 Programming Languages (Nested List)</h2>
```

```
<ul>
  <li>Programming Languages
    <ul>
      <li>C</li>
      <li>C++</li>
    </ul>
  </li>
</ul>
```

```
        <li>Java</li>
        <li>Python</li>
    </ul>
</li>
```

```
    <li>Web Technologies
        <ul>
            <li>HTML</li>
            <li>CSS</li>
            <li>JavaScript</li>
        </ul>
    </li>
</ul>
```

```
<hr color="brown">
```

```
<h2>🌐 Useful Link</h2>
```

```
<p>
Visit the
<a href="https://www.google.com" target="_blank">
Google Website
</a>
for learning resources.
</p>
```

```
<hr>
```

```
<center>
<h3>★ Thank You ★</h3>
<p>Created by: Savitha R</p>
</center>
```

```
</body>
</html>
```

Output:
